**Subject: Fwd: 2nd NTP Fluoride Update**

Hello Dr. Wolfe/Dr. Bucher:

It has been eleven days since our teleconference on fluoride. Although I have not received a response from you or Dr. Bucher for follow up, Dr. Bucher is out again promoting fluoride in a public interview:

Dentist damaged his own son's teeth with fluoride:

<http://www.telegram.com/news/20170226/fluoridation-remains-complicated-matter-for-worcester>

I would like my questions answered at this time. Here is a high quality enhanced recording of our 2017 FEB 16 teleconference:

<https://m.youtube.com/watch?v=cTTEEZaSSIA>

I will assume the EPA TSCA petition response dated today by the Government Publishing Office is the Trump administration's position on water fluoridation:

<https://www.gpo.gov/fdsys/pkg/FR-2017-02-27/html/2017-03829.htm>

For many of these government people copied here, they were informed of envirovictims. Yet they failed to give us equal face time before the EPA TSCA petition response was crafted and published with Wendy's name attached to it. This is unacceptable not to meet and listen to victims while paradoxically rejecting the petition on the basis that it did not prove victims of neurotoxicity from water fluoridation existed.

Again as I stated earlier for the record, the HHS withheld draft document I have been waiting on for two years through FOIA was not provided for the NTP teleconference on FEB 16th. I am awaiting for Catherine Teti to answer my questions on the document in the appeals process that Michael could not answer on the day of the teleconference.

Please advise.

Thank you,

Jill Jennings-McElheney

**Subject:** 2nd NTP Fluoride Update

Dear Dr. Wolfe & Dr. Bucher:

Thank you for the teleconference update on Thursday. It was appreciated that you went overtime to address everyone's questions. If you would like a high quality sound copy of the teleconference for your archival purposes, please let me know.

I would like to state for the record that HHS withheld an important draft document that I had requested before the teleconference Thursday. I explained in the dispute resolution stage of my FOIA request (up until the day of the teleconference) that this draft document was critical for review. The withheld draft document is now in the FOIA appeals process.

I would like to state also that I had requested a meeting with EPA before our NTP teleconference to discuss the new administration's position on water fluoridation, and for the agency to elaborate how it has implemented 2016 TSCA law revisions and shored up infiltrating industry conflicts of interest. This information would be reported back to the House Committee on Science, Space, and Technology which held the Make EPA Great Again hearing on FEB 7. EPA is in total disarray now, and for reasons unknown, refused my requests for a meeting. This meeting was requested for equal face time for envirovictims including water poisoned victims in GA and EPA Region IV.

Although Dr. Bucher made it known on the teleconference Thursday that NTP has a duty to report to regulatory, he did not identify which regulatory agency. Can he do so at this time?

Can you let me know also how many lines were utilized on the call including international callers? Can you disclose the one researcher Dr. Bucher mentioned who is heavily involved and oversees the entire fluoride project?

In closing, I would like to request that NTP consider another public update at the appropriate time given the timeline Dr. Bucher presented. Is this acceptable?

Thank you,

Jill

P.S. As NTP advances on Dr. Bill Osmunson's carcinogenic and endocrine disrupting fluoride nominations, please acknowledge that NTP is in receipt of:

**EPA Internal Memo from Dr. William Marcus'  
1990 May 1 on NTP Bioassay on Fluoride**
